R e a d :--

Letter No. 5524 dated the 25th November 1907 from the Revenue Commissioner in Mysore regarding the levy of contribution and water rate from the Inamdar of the Madavadi Inam village in the T.Narasipur Taluk on account of the facility afforded for irrigating his inam lands by the extension of the Holesal channel.

@@@@@@@@@

Order No. R. 5367-9/^{R.M.}120-07-2

Dated Bangalore, the 21st ^{February} ~~January~~ 1908.

The extension of the Holesal channel up to Madavadi took place in 1896 and water was supplied for irrigation from September of the same year. In November 1896 the late Mr. B. K. Venkatavarada Iyengar, then the Deputy Commissioner of the --- Mysore District, directed contribution to be levied from the Inamdar of the Madavadi village at the rate of Rs. 30 an acre. Water rate was also fixed at Rs. 4/- per acre from the year 1897-98.

2. The Inamdar objected to the payment of contribution and water rate on the grounds (1) that he had not executed any --- muchalika to pay contribution (2) that as the village was bechirak and as he had newly brought it under cultivation, he was entitled to special treatment (3) that the rate of contribution which was demanded was excessive (4) that a part of the entire extent of land (231 acres and 27 guntas) which had been recorded

as irrigable by the Survey Department was not fit for cultivation and another part could not be irrigated, being at a higher level than the channel. Mr. H. H. Sparkes before whom this -- dispute came for decision declined at first to interfere with his predecessor's orders and the amounts due on account of contribution and water-rate was thereupon entered ⁱⁿ the accounts and shown in the demand against him.

3. On the Inamdar applying for ^a/reconsideration of the order, Mr. Sparkes visited the Inam village and after inspection ---- directed the rate of contribution to be reduced to Rs. 15/- per acre as no higher contribution was levied on lands in the Kiriginur, Kaglipur and Belakavadi villages irrigated from the same channel. He also directed the District Surveyor to ascertain the extent of unculturable lands in the village. The District Surveyor reported that 61 acres and 36 guntas were not fit for cultivation as, out of this, 27 acres and 5 guntas were sandy and 27 acres and 17 guntas could not be irrigated being situated at a higher level than the channel and the remainder 7 acres 14 guntas was overgrown with jungle. Thereupon the Deputy Commissioner directed that contribution and water-rate should be levied on only the cultivable area viz., 169 acres and 31 guntas

4. In the account the amounts due by the Inamdar have already/

			been entered
<u>Demand as shown in the accounts.</u>			as demand on
1. Water rate for 231½ acres at Rs.4 per acre for 9 years from 1897-8 to the end of 1905-06.....	8334-0-0		the basis of
2. Contribution for 231½ acres at Rs.30/- per acre.	6945-0-0		rates ori-
			ginally --
			fixed by Mr.
T o t a l.. . .	15279-0-0		B.K.Venkata
<u>Demand to be retained.</u>			varada ---
1. Water rate for 169 acres 31 guntas at Rs.4 an acre for 9 years.	6111-13-6		Iyengar. As
2. Contribution for 169 acres 31 guntas at Rs. 15 per acre.	2547-0-0		shown in the
T o t a l.. . .	8658-13-6		margin a sum
Balance to be removed from the demand. . .	6620- 2-6		of -----

Rs. 6620-2-6 is found to have been entered in excess in the --- accounts if the contribution and water rate are to be levied according to the revised rates adopted by Mr. Sparkes. This amount is now recommended for remission. The present Deputy Commissioner Mr. M. Kantharaj Urs while agreeing that the ---- settlement effected by Mr. Sparkes is on the whole equitable, considers that, as the land treated as unculturable could to a great extent be brought under cultivation with some expenditure of labour and capital, the Inamdar should either be compelled to reclaim it within a reasonable time or be made to pay proportionate contribution and water-rate on the actual cultivable area, if he fails to do so, as some compensation for the large amount spent by Government on the extension of the channel. The Revenue Commissioner is of opinion that it would be unfair to compel the Inamdar to pay contribution and wet rates for the -- lands said to be on a higher level than the channel, which cannot be brought under cultivation without heavy expenditure of labour and capital. As regards the lands said to be unirrigable on account of sandy soil and jungle he proposes to fix in consultation with the Superintendent of the Revenue Survey the exact area on which water rate may fairly be demanded, and make a further communication if necessary.

5. The Government are pleased under the circumstances to -- direct the amount of Rs. 6620-2-6 to be written off the accounts as recommended. The Revenue Commissioner's further proposals as to the exact area over which water rate ought to be levied are awaited.

(sd) P. G. D' Souza

For Secretary to Government,

To

The Revenue Commissioner in Mysore, with the enclosures.

FROM

P.Raghavendra Rao Esq., B.A., B.L.,
Revenue Commissioner-in-Mysore.

To

Chief
 The Secretary to the Government of
 His Highness the Maharaja of Mysore,
~~Department.~~

SIR,

With reference to the Revenue Secretary's letter, No.J.1615 dated the 14th November 1917, and to your letter, No.J.2193 dated the 20th ultimo, requesting an expression of opinion on the provisions of the Draft Irrigation Bill and their effect on the existing Revenue Laws in Mysore, I have the honor to state that I regret I am unable, at this stage, to express my own views in the matter, which is a very important one and concerns the ryot in a vital manner. Your views - as Deputy Commissioner - as well as those of Mr.Matthan, called for in the Revenue Secretary's letter No.R.8523 dated the 13th February 1917, were sent with this office, No.C.3264 dated the 10th July 1917 along with the opinions of the Deputy Commissioners of Bangalore, Kolar, Tumkur and Kadur Districts. In this connection, I beg to invite kind attention to the opinion held, and given expression to, by my eminent predecessor in office - the late Mr.K.S.Doraswami Iyer - in his communication of 10th July 1917 on this subject to the Government.

I have the honor to be,

Sir,

Your most obedient servant,

P. Raghavendra Rao
 21.1.18
 Revenue Commissioner.

H.V.

From

GEN. & REV. SECRETARIAT
III
JUDICIAL
23 JAN 1918

The Revenue Commissioner in Mysore.

To Chief
The Secretary to the Government of
H. H. the Maharaja of Mysore,
~~Department.~~

Dated 19th January 1918.

Despatched

Received

General No. R. D. 31042/17-18 -

Enclosure No. 4460

SUBJECT.

Re the expression of opinion
on the provisions of the Draft Irriga-
tion Bill and their effect on the
existing Revenue Laws in Mysore.

Routine Notes.

[To be used only for notes, requisitions, etc., not intended for permanent record.]

As orally directed, I submit
 herewith a short note ~~on~~ as
 to how the proposal for an
 Irrigation Regulation originated
 and how it was criticised and
 dealt with at various stages.
 I ~~have~~ also submit an abstract
 of the various criticisms, and show
 this may be met, and a draft
 Bill modelled on chapter X
 of the Bombay Irrigation Act.
 This chapter refers solely to
 second class Irrigation works
 and ~~is~~ except such works
 from the operation of many of the
 provisions in the previous part,
 and hence is simpler and easily
 understood. But some of the
 provisions applicable to such

N.B.—Should routine notes be written on small slips,
 the notes must be copied, or slips pasted on
 this form.

W.D. 81—GPB—60,000—20-7-15

second class works do not seem
 to be applicable to our local
 conditions and will have to be
 omitted. The draft will be revised after
 suggestions are received from members of the C.
 Secy)

CENTRAL OFFICE.

Bangalore, 11th May 1916.

From

Rajasabrahmushana
KARPUR SHRINIVASRAO, Esq., B.Sc., L.C.E.,

~~Off.~~ Secretary to the Government of Mysore,

Public Works Department.

To

V.R.Thyagaraja Iyer, Esq., M.A.,

Secretary to Government,

Revenue Department.

DIARY No. 6310

19 - 19
SECTION

Sir,

With reference to Dewan's orders dated the 23rd December 1913, I have the honour to forward herewith the file relating to the draft Irrigation Act, for favour of further needful action.

2. The draft Act was submitted to the First Member of Council and he was of opinion that some of the provisions therein were superfluous and might be omitted, as they are already covered by the Land Acquisition Regulation, the Indian Penal Code and other previous acts. But reference is invited to the answers given by the Executive Engineer, Irrigation Division, to those remarks and it will be seen therefrom that such provisions are not wholly covered by previous regulations and are necessary in this Act.

3. In addition, the fact that such provisions have been made in Irrigation legislature in British India, in spite of the Land Revenue Code, &c., though in itself no positive argument in its favour is an analogy forcible enough to justify their inclusion here.

1915-16.

MYSORE P. W. DEPARTMENT.

No. 946
4513.

From

The Secretary to Government,
P. W. Department.

To

The Secretary to Government,
Revenue Department.Dated Bangalore, 11th May 1916.Despatched 12th May 1916

Enclosure No. 1 file.

SUBJECT.Forward Shufle relating
to the draft Irrigation
Act, for further needful
action.

4. Mr.Ramanathan, Assistant Secretary, it is believed,
has abstracted the essential clauses that must find a place
in the Act.

I have the honour to be,

Sir,

Your most obedient servant,

W. Sundara
For Secretary to Government,

W

P.W. Department.

V.M.S.

Subject - Draft Mysore Irrigation Act

Dewan's orders - "The Public Works Secretary should be requested to submit a brief note not exceeding two pages, explaining the scope, objects and the main provisions of the Bill. When this note is ready, the Secretary should take steps to arrange for a preliminary discussion in Council at which the Revenue Secretary may also be present. The question has been long pending for some reason or other. The Secretary should be good enough to be reporting progress to Council once a fortnight commencing from 1st July 1946."

Unoffl no 191/P.W.D dated the 23rd June 1946.

Forwarded to the Engr. Engineer, Irrigation Division, for attention to the Dewan's orders & very early resubmission

Papers relating
to the Draft
Mexican Import Bill

Reasons given introduction of the Bill.

1. Almost all the British
Provinces have Irrigation Acts
on the lines of the proposed
Bill.
2. ~~These~~ ^{More} powers than ~~actual~~
now exist are required
to bring the irrigation
works to a condition of
maximum efficiency and
to construct new works.
3. Dual control now
existing and the staff
employed are not
conducive to improvement.
Existing irrigation organ.
is defective.
4. The existing law is
~~also~~ ^{also} defective inasmuch
as there is no provision for
enforcing compulsory labour
for the construction of ^{the} ~~the~~ chief
by bridges, embankments etc.

(1858; 1c)

5. There are not ^{sufficient} facilities for
the construction of water courses
by private enterprise.

6 It will be very convenient
if a self contained Act on the
whole subject is enacted

7. The general criminal law
can not conveniently be
applied without causing delay
with various offences which
interfere with the manage-
ment of ~~the~~ irrigation
works. (This for analogy
see in law, Forest Law, &c)

8. Sufficient safeguards
have been provided against
undue exercise of power.
~~Provision~~ ^{Right} of appeal ~~are~~ is
conferred and provisions have
been made for suitable
compensation in case of

injury. ^(as was formerly provided in the 2nd Code)
7. More equitable relief to rights seems
necessary in the case of the people of the

Points for consideration

1. Necessity for the Bill.
2. Its ^{object and} scope, and the main provisions thereof.

1. [See note below which please type here]

2. The Digest of the Bill is to enable Govt. to frame rules for the construction, new, and maintenance existing irrigation works.

(1858; 1c)

5. There are not ^{sufficient} facilities for
the construction of water courses
by private enterprise.

6. It will be very convenient
if a self contained Act on the
whole subject is enacted.

7. The general criminal law
can not conveniently be
applied without causing delay
with various offences which
interfere with the manage-
ment of ~~the~~ mining
works. (The analogy
exists in law, *Forest Law, &c.*)

8. Sufficient safeguards
have been provided against
undue exercise of power.
~~Provision~~ ^{Right} of appeal ~~are~~ is
conferred and provisions have
been made for suitable
compensation in case of
injury. ^(by way of abatement of mine)
More equitable relief to rights seems
to be provided in the 2d Code
than in the 1st Code.

introd

irriga

the th

My argument advanced
against the Bill: -

The necessity for the Bill
has not been clearly
established.

2. Necessary additional
powers may be conferred
by executive orders or rules
issued under the Land
Revenue Code or other laws

3. Mysore is not a country
of peasants, and the legislative
enactments suited for such a
country should not
be introduced here

Introduction.

In submitting his proposals for the introduction of the "Elock System" of irrigation under the Marikanave channels, then Chief Engineer (Mr. M. Viswesvaraya) requested Government for approval "being given" to frame and bring into force an Irrigation Act on the lines of those in force in British Provinces. Government in approving of the introduction of the system, "sanctioned his proposals in - - their entirety" in their Proceedings No. 1808-12 - 9875-9 dated 5th December 1912. A draft Bill was accordingly prepared in the Public Works Department and submitted to the Dewan on 16th December 1913. The Bill was ordered to be circulated to the First Councillor (Mr. H. V. Nanjundayya) and he was required to arrange for its scrutiny by the Revenue and Legislative Departments. Mr. Nanjundayya remarked on 5th November 1914 among other things,

- (1) that the necessity for the Bill has to be justified by more details than those given in the Note of the Public Works Department
- (2) that the British Provinces have Irrigation Acts is no reason by itself for our having one
- (3) that if powers are really necessary for the P.W.D. they may be conferred by executive orders and rules framed under existing enactments, and
- (4) that the Revenue and P.W.D. Secretaries might examine the draft with special reference to his remarks and met him personally for consultation.

The provisions of the Bill were --

accordingly

accordingly discussed, and Mr. H. V. - -
Nanjundayya finally noted on 13th January
1916, that a shorter Regulation might be
drafted by leaving out all the provisions
that are now found in the Land Acquisition
Regulation and other enactments.

The Chief Engineer then returned
the file ^{with the document} that the provisions were all
necessary and that none of them could ^{be} con-
veniently removed.

The Bill was then submitted to the
First Member (Mr. A. R. Panerji) who re-
marked that before passing the Bill the
~~defects~~ ^{defects} brought to notice about the irri-
gation works generally and the depart-
mental arrangements should be removed that
the dual control over irrigation at - -
present existing, and the staff employed
do not help in improving matters and that
they should receive reconsideration.
(11th June 1916).

The Public Works Secretary was then
required by the Board to submit a brief
note explaining the scope, objects and
the main provisions of the Bill. The Note
was prepared and submitted to the Member
(Mr. A. R. Panerji) who found the Bill
much too elaborate, and the existing irri-
gation organization defective. He also
noted that Mysore was not entirely a - -
canal Province and the law to be intro-
duced should be adopted to local condi-
tions after the agency to work it is ^{was} pro-
vided

provided for on an efficient basis. The Second Member (Mr. K. S. Chandrashekhar Iyer) suggested that the Revenue Commissioner and the Deputy Commissioners might be consulted about the necessity for the Bill and its provisions. In an informal discussion held on the matter, on 3rd August 1916, the Council held that the idea was to make a regulation applicable to new works of irrigation, and the P.W. Secretary should work up the case with the help of the Revenue Secretary and bring the case before the Council. When the case was brought before the Council on the 10th February 1917, they resolved that the Revenue Commissioner be requested to obtain the opinions of Messrs. Balasundaram Iyer and Nathan submit the same together with his opinion before the end of March. As the opinions were not received, ^{within} a committee consisting of the Chief Engineer, the General Secretary and the Revenue Secretary was ordered to be constituted for dealing expeditiously with the bill.

The opinions of the Revenue Commissioner and of the Deputy Commissioners have ^{since} been received. (The opinions of the Deputy Commissioners of Hassan and Shimoga are reported not to have been received yet.) Of the Deputy Commissioners, all except Mr. Bowring are in favor of the introduction of the Bill, and

he

the Revenue Commissioner thinks that the channel offence rules require modification according to the present requirements, and that as no serious difficulties have been felt till now in the administration of the existing law, it is better to print and circulate the bill to Deputy Commissioners, Assistant Commissioners and Amildars.

Provisions which are likely to be
considered as of a revolutionary
character are: —

1). §. 28. Power to stop water supply is
for the purposes mentioned therein not
for other purposes. (clause 21 of the draft bill)

(clause 23 of the
Bill)

2) § 31. Compensation is not payable ^{on} in
certain cases of damages, but persons
who suffer loss from any discrimination
quoted is entitled to compensation
by way of premium of water rate.

(clause 16)

§ 35. D^y Com^r can award compensa-
tion in such cases.

(clause 27)

§. 36. Such decisions ~~of the~~ D^y
Com^r are appealable.

(clause 32)

3). § 42. Where the land revenue is
fixed with reference to such water
advantage, compensation to be
granted will take the form of
abatement of land revenue.

(clause 33)

§. 43. An inferior holder will
have his rent proportionately
abated.

(§. 38 & 39)

4). The provisions regarding the
Right of right

5)

The important sections or provisions of the Act of 1879 which are omitted in the proposed draft are—

1) § 5, 6, 7.

Whenever Govt. considers that any water of any river or lake is necessary for an irrigation work, notification may be published and irrigation officer may then enter any land and take necessary measures for such use of water. The irrigation officer may ~~not~~ also enter any land for any purpose in a projected irrigation work or existing one.

2) § 25. If owner of water course fails to execute work or to repair the water course, irrigation officer may get it done and recover cost.

§ 26. By consent, irrigation officer may decide disputes about mutual rights liabilities of persons interested in a water course. Failing such consent, matter has to be referred to a court whose decision will be binding ~~the~~ set aside by a Court.

3) § 27. Water should be supplied on written application to irrigation officer.

19. Duration of supply is limited to 12 hours in the case of small works.

4) § 44. Rates for supply of water
shall be levied as may be sanctioned by
Govt

Increased rates may be levied
for increased water supply.

§ 45. When a person is authorized
using ~~irrigation~~ water can not be
identified, all persons benefited
shall be liable for a charge.

§ 46 & similarly when water is
suffered to run to waste.

§ 47. ^{Members} ~~Rates~~ are recovered as
water rates.

§ 48. Land deriving benefit
from percolation ~~or leakage~~
is liable to water rate.

§ 49. The rates are recovered
as arrears of land revenue.

obtaining labour privileges in
works.

The Mysore Irrigation Bill.

Memo of Modifications Proposed.

=====

Suggestions.	Action to be taken
1. Canal officers should have, in special cases, power to restrict supply and prevent particular numbers from taking or wasting water. This is analogous to Rule 6 framed under section 70 of the Bombay Act. Tank Panchayats specially appointed may also be empowered to exercise this power.	1. Rule 6 framed under section 70 of the Bombay Act provides for this. Similar rules may be subsequently framed by Mysore.
2. <u>Rules for working the Tank Panchayats.</u> The bill does not contain provision to constitute Tank ranchayats, nor the Bombay Act. Both confer the powers usually exercised by the Tank Panchayats on the canal officers themselves. Panchayats, wherever found necessary may be and have to be constituted as per existing Mysore Regulation. Accordingly provision for this has to be made in the draft bill. As per section 4 clause (b) of the draft bill, any	

Suggestions.	Action to be taken.
person, Government may deem fit, can be invested partly or wholly, with such powers and duties which are exercised by a canal officer. Provision can be made in this section for the Panchayat by adding the word "or persons" after "person" in section 4 clause (b).	2. Section 4 clause (b) after "person" add "or persons"
3. The introduction of the block system of irrigation should find a place in our draft rules. This can be provided for, under section 27 by adding the words "to the lands commanded by a canal or selected blocks thereof," after "given".	2. Section 27. After "given" add the words "to the lands commanded by the canal or selected blocks thereof."
4. The bill should also provide for existing tanks to be brought under operation for purposes of regulation and control. As per section 1, any irrigation work can be brought under the operation of this Act and by adding the words "tanks major and minor" after "reservoirs" the above purpose can be served.	4. Section 3, Sub Division clause (a) after "reservoirs" add "tanks major and minor."

Suggestions.

Action to be taken.

5. If the canal is to work satisfactorily, the lands must be allotted water by the P.W.D. and the measuring of the irrigated land should also be done by the P.W.D., as in Bombay.

Bombay rules framed under section 70 contain this provision and similar rules can be framed here under section 62 of the draft bill.

5. Suitable rules to be framed under section 62 subsequently.
